Senior Evaluation Officer

Directorate for Access, Inclusion & Skills

Partnership evaluation - short term response (June 2020)

- Recognise evaluation is responding to rapidly planned activities alongside other challenges
- Evaluate from the start – tracking and data collection
- Evaluate activity where feasible, valid and ethical
- Adapt existing monitoring and evaluation for new online activities – not radically different outcomes
- Rapid evaluation feedback important for brand new activities in a different and dynamic context

August 2020 Evaluator network meeting After action review

What happened (plan vs. reality)...

- Necessarily reactive rush to align evaluation with adapted outreach delivery
- Steep learning curve in online data collection and integrating evaluation with various systems & learning platforms
- Difficult to collect individual learner data from online attendance but easier to collect basic monitoring data (e.g. numbers attended, website hits, downloads).
- Online evaluation learner surveys:
 - Often no/lower responses online, especially when shared via teachers/ schools
 - Incentives didn't work well
 - Responses improved when linked to more intensive activities
 - Responses more likely to be from non-target non-WP learners
 - Better responses to more research focused surveys

What went well...

- Overcoming difficulties obtaining learner tracking data by building in info requests at sign up via online consent forms
- Teachers and staff generally keen to be involved in qualitative evaluation
- Once technical issues overcome, online events/evaluation were relatively easier to run
- Some positive experiences embedding evaluation in the adapted delivery - a collaborative response (though some found it more difficult)
- Speed of online survey response returns

Where to improve...

- Preparation for faster movement between f2f and online delivery with evaluation embedded.
- Reaching our target (and WP) learners with online delivery
- Using technology that supports individual learner monitoring data collections for registrations and attendance
- Improve response rates for important online evaluation surveys
- Embedding evaluation within online resources so it is integrated with delivery (learning from provider teaching best practice)
- Exploit benefits of integrating online tools/technology (e.g. phone apps, QR codes, gamifying evaluation with polling software such as [mentimeter](#)/[vevox](#)/kahoot/ zoom polls, linking with social media, etc.)

Thank you!

Office for
Students

The logo for the Office for Students (OfS) is located in the top right corner. It consists of the letters 'OfS' in a white, sans-serif font, enclosed within a dark blue right-angled triangle. The triangle is positioned such that its hypotenuse follows the curve of the slide's background.
