

# Fostering Meaningful Student Voice

**Wednesday 29 March 2023**

**09.45 - 15.15**

**Online Event**

There are many approaches that aim to take account of student voice. However, some areas may be under-utilised, tokenistic or hard to access for many students, particularly those from under-represented groups.

This event will explore some of the definitions surrounding student voice, the challenges and opportunities this area brings and how student voice can be effectively and ethically included to enhance student access, success and progression.
